

June 2019

At Kidz Club

Winter occurs after autumn and before spring in each year.

Winter is caused by the axis of the Earth in that hemisphere being oriented away from the Sun. Different cultures define different dates as the start of winter, and some use a definition based on weather. The children are once again exploring indoor play and enjoying more art and craft activities, fine motor experiences and our IT educational program. This month's theme is Winter and the children will be learning all about this interesting season including educational science experiences. Enjoy the rain and the new lush green life that is all around.

Blossoming Butterflies

Under the Sea help teach the little ones about an incredible creature that live in the ocean. The best way to learn is through play.

Interactive Experiences:

- *Under the sea sensory bottles*
- *Interactive trays with slim and sea animals*
- *Small group time experiences with songs / stories*
- *Gloop tray with shells and sea fish to explore sensory*
- *Matching and sorting sea creatures*
- *Art and craft making a sea theme wall to encourage fine motor and creativity*
- *Making star fish cookies*
